BASIC BPA TRAINING

20-24 MAY 2024

40-HOUR COURSE / EASINGWOLD, UK

This week-long residential training course focuses on the **BASIC APPLICATION OF BPA**, and is suitable for Forensic Scientists, Law Enforcement Personnel, Crime Scene Investigators, Laboratory Practitioners and other individuals aligned with BPA in the laboratory or at crime scenes.

The course uses classroom-based and practical (wet-blood) sessions, including simulated-assault scenarios, to provide participants with a knowledge base that will underpin the robust assessment of bloodstain patterns at crime scenes and on items examined in the laboratory. It meets the educational standards as defined by the IABPA and successful participants are able to apply for industry-standard professional membership.

Instructors: Jo Millington & Gillian Leak

ADVANCED BPA TRAINING

11 - 15 NOVEMBER 2024

40-HOUR COURSE / EASINGWOLD, UK

This week-long training course delivers theoretical and practical instruction in **ADVANCED BPA** and focusses on the application of BPA at crime scenes.

The course is structured to allow participants, who have previously attended Level 2 (Basic) BPA Training (or a documented equivalent), to improve their skills and knowledge and attain competency in the independent analysis of bloodstain patterns at crime scenes and provide subsequent testimony as an expert witness.

It is suitable for Forensic Scientists, Law Enforcement Personnel, Crime Scene Investigators, Laboratory Practitioners and other individuals aligned with BPA in the laboratory or at crime scenes as part of their ongoing professional development in BPA. It includes a session on gunshot-generated spatter, which is unique in the UK.

Instructors: Jo Millington & Gillian Leak

RECENT PARTICIPANT FEEDBACK

Great to have such a varied group of participants: CSIs, FSPs, students, bringing all our experiences together.

The course exceeded all expectations - the range and depth of teaching was amazing and it was a privilege to learn from Jo & Gillian. Thank you!

Most valuable topics: Learning objective criteria for each spatter pattern type & gunshot-generated spatter presentation

All of the blood practical work was fab and a great opportunity to see examples in person. The wearing of clothes & work with meat in simulated assault situations was really good.

Extremely interesting and stimulating course, delivered by instructors who are at the top of their game. A career highlight.

Professional training at its best - all relevant to my job [CSI]

A fantastic opportunity to refresh my understanding of BPA, after 25 years in practice.
