RECENT PARTICIPANT FEEDBACK

Extremely interesting and stimulating course, delivered by instructors who are at the top of their game. A career highlight!

Great to have such a varied group of participants: CSIs, Forensic Science Practitioners, students, bringing all our experiences together.

Most valuable topics: Learning objective criteria for each spatter pattern type & gunshot-generated spatter presentation

Food is delicious!!

Professional training at its best - all relevant to my job [CSI]

Blood practical work was fab. Great opportunity to see examples in person. Simulated assault situations were really good.

Fantastic opportunity to refresh my understanding of BPA, after 25 years in practice.

The course exceeded all expectations - the range and depth of teaching was amazing and it was a privilege to learn from Jo & Gillian. Thank you!

Highly recommended
